

Atkins, a SNC Lavalin company, has been providing infrastructure planning, engineering, construction, environmental consulting, urban planning, architecture, and program management services to public and private clients across the United States for more than 50 years.

Globally, Atkins is the largest UK-based engineering and design consultancy and one of the world's largest design firms with nearly 18,000 employees worldwide. We have the depth and breadth of expertise to respond to the most technically challenging and time-critical infrastructure projects and the urgent transition to a low-carbon economy.

Atkins seeks an energetic and highly motivated self-starter to join either our **Lynnwood, WA or Oakland, CA office** as a **FEMA/Water Resources Project Manager**.

### **MAJOR FUNCTION/ROLE**

In this role you will apply your knowledge of the National Flood Insurance Program by providing project management and technical leadership to the development and delivery of flood risk studies for FEMA's Risk MAP program. Candidates must have a thorough understanding of floodplain management, hazard mitigation, and risk communication.

### **JOB DUTIES**

- Leading the delivery of flood risk projects including the development of regulatory and non-regulatory products.
- Responsibilities include monitoring budgets, schedules, product quality, and compliance with standards.
- Communicating with clients, establishing goals and objectives for project teams, and scheduling and coordinating resources.
- Mentoring of technical staff.
- Assisting in development of responses to RFP/RFQs.
- Developing strong relationships internally and with clients.
- Coordinating the work of junior professionals, technicians, and others who assist in specific assignments.

### **EDUCATION AND EXPERIENCE**

Bachelor's degree in Civil Engineering (Preferably with a focus in Water Resources), Geography, or Environmental Science. Management coursework and/or MBA a plus. This level may be achieved with eight years of experience in project production and technical professional activities, two of these working as a Senior Technical Professional.

Minimum 8 years of experience with the National Flood Insurance Program and floodplain mapping and mitigation, with direct experience in the development and delivery of regulatory and non-regulatory products.

## **SPECIAL SKILLS**

- Have a thorough understanding of the National Flood Insurance Program, specifically the Risk MAP Program.
- Prior experience managing FEMA floodplain studies is preferred.
- Familiarity with FEMA systems and databases such as MIP, CIS, P4, Mitigation Action Tracker, and FHD web.
- Knowledge and experience with Earned Value Management.
- Familiarity with GIS mapping and project management tools (i.e. MS Project).
- Proficient technical writing and communication skills, must be detailed oriented.

## **PROFESSIONAL REGISTRATIONS**

- Professional Engineer (PE) preferred.
- Certified Floodplain Manager (CFM) preferred.

## **ADDITIONAL REQUIREMENTS**

Ideal candidates must have at least 8 years of experience with a combination of: riverine modeling, coastal modeling, hazard mitigation technical assistance, research and design expertise, DFIRM and FIS development, GIS, hazard mitigation plan development, grant writing, or other floodplain related activities. Being a Professional Engineer (PE) and a Certified Floodplain Manager (CFM) is preferred. Candidate must have a degree in engineering, geography, environmental science, or other related field.
