## About us

We provide a full range of water resources engineering services to clients worldwide. Our staff's distinguished educational backgrounds, exceptional technical capabilities, and broad project experience enable us to provide outstanding consulting services in support of our clients. The firm, established in 1990, is a certified small business with a main office in Sacramento, CA and a satellite office in Green Bay, WI.

The firm is built upon our proven approach to providing high-quality service:

1. Understand our client's needs.
2. Design a solution that is appropriate for the problem.
3. Communicate clearly.
4. Get the work done well, on time, and on budget.

## Job opportunity

We are hiring an associate water resources engineer at our Sacramento office. Under the guidance of senior staff, the associate water resources engineer will:

- Complete water management studies, including hydrologic, hydraulic, reservoir system, and economic impact modeling, floodplain analyses, and planning studies.
- Collect, manage, and analyze data.
- Assist with development of analytical methods and tools.
- Draft technical reports.

A bachelor's degree in civil engineering or closely related field is required. A master's degree, Engineer-in-Training (EIT) certificate, related experience, and training in hydrologic and hydraulic modeling applications are a plus. Effective written and verbal communication skills are required.

We offer competitive salary and benefits, provide training, and encourage participation in professional activities. To apply, send your resume and cover letter to [support@ford-consulting.com](mailto:support@ford-consulting.com).
