

**Senior Water Resources Engineer / Floodplain Mapping Study Manager
Reno, Nevada**

Michael Baker Jr. Inc., a division of Michael Baker Corporation, seeks a Senior Water Resources Engineer (Technical Manager II) for our Reno, Nevada office.

Michael Baker Corporation (<http://www.mbakercorp.com>) provides engineering and operations and maintenance services for its clients' most complex challenges worldwide. The firm's primary business areas are aviation, environmental, facilities, geospatial information technologies, pipelines and utilities, transportation, water/wastewater, and oil and gas. With more than 4,000 employees in over 50 offices across the United States and internationally, Baker is focused on delivering innovative and sustainable solutions for infrastructure and the environment. Michael Baker Corporation is ranked among the top 50 national design firms (ENR 2007).

The Senior Water Resources Engineer will help manage many of the exciting water resources projects that the company currently has. This position will primarily serve as a Study Manager for engineering analyses for H&H studies in Nevada, Northern California, and/or Arizona.

Requirements and Preferences for the Senior Water Resources Engineer /Study Manager are:

Requirements:

- 4 year degree in Civil Engineering
- Nevada PE is required (or is required to be imminent).
- Minimum of 10+ years related work experience.
- Knowledge of the FEMA National Flood Insurance Program (NFIP) and a thorough understanding of engineering, mapping and floodplain management, including project scoping, H&H analysis, flood hazard mapping, map adoption and mitigation planning.
- Knowledge of floodplain modeling and delineation, flood insurance studies, FEMA's Guidelines and Specifications for Flood Hazard Mapping Partners, USACE levee policies/procedures, drainage design, drainage impact analysis, Digital Terrain Analysis, ArcGIS, and ESRI Products
- Excellent communication and organizational skills are key in this dynamic environment.

Preferences:

- A strong background or interest in hydrology and hydraulic analyses, mapping behind levees, DFIRM production, floodplain management, and GIS applications for Water Resources
- Proficiency in HEC-1, HEC-2, HEC-HMS, HEC-RAS or advanced H&H modeling desired.
- Previous experience in leadership positions, clearly demonstrating successful supervision of subordinate employees.
- Proven project management skills, such as assembling and leading teams, establishing and maintaining project schedules, customer interface, and budget development. ,
- Experience and/or interest in Business Development
- CFM certification
